Hasta donde entiendo pide que cambiemos en el xml de la definicion de parametros del shape, en dalfile, el nombre del grupo que va asociado a los distintos parametros.

Supongo que sera sencillo cambiar "other" por "advanced".

No tengo tan claro el de "general" por "basic". Para eso igual habria que tocar en org.gvsig.tools, en la parte de swing, ya que por defecto mete una pestaña "general" para los que no tienen grupo.

Como posible idea, propondria que en el xml se asignen todos los campos de los parametros a "basic" y retocar el codigo de tools para que no cree la pestaña general si va a estar vacia, pero no se lo complejo que puede ser esto.

The "General" tab is only created if there are one or more attributes without group.
