History

#1 - 09/12/2012 04:30 PM - Juan Lucas Domínguez

- Status changed from New to Fixed

gvsig-desktop:r38885

Start/stop editing using the EditionManager.

#2 - 09/12/2012 04:39 PM - Juan Lucas Domínguez

Test:

- Create a view and add two shapefiles
- Start editing in one layer and then start editing in the other layer (without stopping editing in the first)
- Now both layers are in editing mode
- Edit one of the geometries and stop editing in that layer
- Check that if you select the layer which is not in editing, the console for editing commands disappears and if you select the layer in editing, the console appears.
- Stop editing in the other layer.

If the previous steps have no issues, then the feature request is OK.
