Description

The tools that add geometric info to the attribute table of a layer should have a warning saying something like "It will be added a new field containing the area (or the perimeter) of each geometry" Do you want to continue? Yes/No

Otherwise the user is not aware of what he is really doing, since he is not seeing the table.

- Status changed from New to Awaiting response

The previous ticket in osor 16022 proposed to make this options active when a table is selected. In this case this ticket doesn't has sense.

No hay que cambiar el funcionamiento de la herramienta o cuando se activa o desactiva.

Lo que se pretende es que al ejecutarse presente un dialogo al usuario que informe que se va a añadir un nuevo campo a la tabla y darle opcion al usuario a cancelar la accion.
