Description

Open gvSIG
Open new View
Add layer (/geodata/vector/SHP2D/provincias_andalucia/provincias_andalucia.shp)
Add layer (/geodata/vector/SHP2D/urb_andalucia/urb_andalucia.shp)
Click on merge tool from geoprocess
At the bottom of the window appears "Dissolve [vectorial]" to choose the output file. In this case is wrong because we are in merge tool, it should be something like "Merge [vectorial]"
