Operative System:	Add-on resolve build: 2050
Keywords:	Proyecto:
Has patch: No	Hito:
Add-on name: Geoprocess: base support (org.gvsig.geoprocess.app.mainplugin)	
Description	
Within the Sextante tool box, when we click on the help button (i) we get an empty window.	
Just in case it has to do with the problem, notice that the structure of the help folder is different in gvSIG 1.11 than in gvSIG 1.12. If we replicate this structure manually in gvSIG 1.12 copying the 1.11 help files, it works fine.

Duplicate ticket. See #491.

#2 - 10/30/2012 08:44 AM - Manuel Madrid

- Assignee deleted (Francisco Puga)
- Priority changed from Normal to High
- Target version set to 2.0.0-rc1
- gvSIG version changed from 1.12.0 to 2.0.0
- gvSIG build changed from 1417 to 2056

As it is duplicated for gvSIG 1.12 I re-use this ticket for gvSIG 2.0

I reopen this ticket, because there are several other SEXTANTE help files missing in BN2227.

As described in #491, unzip the file <http://sextante.googlecode.com/files/sextante.zip> and consider the `help/en\` subfolder. Here there are 271 folders (instead of the actual 219), so 52 help files are still missing.

Se han copiado los archivos de la ayuda en inglés que faltaban.

Además se han arreglado los nombres de algunas carpetas en la ayuda en español que tampoco salían porque no estaban "capitalizados".

Hi Francisco, many thanks for the fix. I'll try it as soon as possible.

Furthermore, the gvSIG geoprocesses in the toolbox have not help files yet and it seems that it's not possible to replicate the same structure of SEXTANTE ones at the moment, neither in the *org.gvsig.geoprocess.app.mainplugin/en* folder , nor in *org.gvsig.geoprocess.app.mainplugin/help/en* one. I'll open another ticket about this.
