Operative System:	Linux	Add-on resolve build:	
Keywords:		Proyecto:	
Has patch:	No	Hito:	
Add-on name:	Unknown		

Description

Open gvSIG
Create a new view
Add layer (http://downloads.gvsig.org/download/geodata/vector/DGN/Albarracin1_SITAR_DGN.zip)
Right click on name layer in ToC, start edition
Delete one element
Right click on name layer in ToC, finish edition
Click Save
A warning message appears:
Exception reading 'Albarracin1_SITAR_DGN'.
Can't finish edition.
null (java.lang.UnsupportedOperationException)

History

#1 - 10/22/2012 01:33 PM - Manuel Madrid

- Subject changed from Warning message appears after delete one element of DGN layer and finish edition to Wrong management of read-only layers at editing
- Category changed from Geoprocess to Vector editing
- Priority changed from Normal to High

Edition over read-only layers should be managed. Two options: 1) let the user export the layer to a writable format or 2) warn the user that changes won't be saved, just at start editing.

#2 - 11/12/2012 05:03 PM - Juan Lucas Domínguez

- Status changed from New to Fixed
- Assignee set to Juan Lucas Domínguez

Fixed return value in allowWrite method (DGN does not allow it yet).

gvsig-desktop:r39215

Test: the behavior should be consistent now.

#3 - 11/16/2012 09:48 AM - Abenchara Socorro

- *Status changed from Fixed to Closed*

Appears a warning message 'This layer has no write permissions. You will be able to export edited data, but no in the same layer'
