Description

1. Install gvSIG 2.0 2056 (typical)
2. Launch gvSIG
3. Create a new view
4. The following warning is shown in the status bar:
     <<Can't enable/show control 'anonymous_0033'>>*

Looking at the Menu information text file we can see that anonymous_0033 corresponds to the menu item "Layer/toc_reproject".

Since this functionality corresponds to the raster reproject plugin, I installed it and checked that the warning no longer appears.

*Note: the number can be different.
