Has patch: No	Hito:
Add-on name: Unknown	

Description

Open gvSIG
Click on Addons Manager from Tools
Click on Next
Make a little bit bigger the install_package window
See how the dimension of description box is reduced (in the bottom)
Click on any ons (eg the first plugin), we can not see the description because the size box is too small
Move the install_package window and the problem is solved
Select on the left menu any category (eg the first: All)
Move the install_package window
Again the size of description box is reduced
