Description

En: If layer labeling is enabled: Doing click on TOC sybology (straight access to symbology editing) has no effects. And this warning in the screen bottom: "Cant' enable/show control 'anonnymous_0035'"
Symbology editing still can be accessed from layer properties.

Es: Si el etiquetado de la capa esta activo: Hacer click sobre la simbología (acceder directamente a la edición de simbología desde la tabla de contenidos) no tiene efecto. Y aparece este mensaje en el borde inferior de la pantalla "Cant' enable/show control 'anonnymous_0035'"

La edición de la simbología aún puede ser accedida desde las propiedades de la capa.
