The gvsproj file is corrupt. I cannot test this bug. Can you attach a good file?

#3 - 11/09/2012 09:11 AM - María Maluenda

- File persistence_WCS_off.gvsproj added

Yes, I attached another project. WCS layer is off,no change and return to save the project,should appears an error. I tested now with the gvSIG build 2057.

- Status changed from New to Fixed

- Add-on name changed from Unknown to Raster base support (org.gvsig.raster.tilecache.app)

- Add-on resolve build set to 29

Además se soluciona un problema que es que al abrir un proyecto WCS en el toc las propiedades del raster aparecen deshabilitadas. Esto aparece en el build 29 de WCS.
