Description

Open gvSIG
Open new View
Add polygonal shape layer 'esp_provincias.shp' (http://downloads.gvsig.org/download/geodata/vector/SHP2D/esp_provincias.zip)
Click in dissolve tool from geoprocessing
Select 'esp_provincias.shp' as Input cover
We can not choose any String field (as e.g. COM field), and it should be possible

Maybe it is related with the ticket #958
