Description			
<p>Open gvSIG New View Add layer puntos_logrono.shp (http://downloads.gvsig.org/download/geodata/vector/SHP2D/puntos_logrono.zip) Click on Buffer geoprocess Area defined by a distance 30 meters We choose 3 as number of rings Save the output as a temporary file Click Ok If we check the result, the 3rd buffer is a composition of 2 polygons, I think the result should be only the bigger one.</p>
