#### Description

Trying to connect to the following CITMA WMS Service "http://inspire.cop.gva.es/mapserver/wms" gvSIG shows the following error message: "The layer cannot be added".

The Service Capabilities file seems to be correctly downloaded at the /tmp-andami directory.

This WMS service can be consumed correctly in previous gvSIG 1.\* versions.

Log attached.

#### History

##### #1 - 12/05/2012 01:04 PM - Manuel Madrid

Hello Victor.

I checked this service and it works. Please, check that the proxy server is set correctly in network preferences. Take into account that the user preferences are not the same for gvSIG 1.x and gvSIG 2.0 so you have to set again some preferences the first time you install gvSIG 2.0.

Let me know if it's not a matter of preferences settings.

Manuel.

Hello Manuel,

it's not a matter of proxy preferences, I can connect with the "http://inspire.cop.gva.es/mapserver/wcs" server, for example.

I'm not sure, but maybe it's because in the WMS Service Capabilities some <Layer> have no <CRS> tags included. For instance, in the

"http://www.ign.es/wms-inspire/ign-base" WMS Service it's possible to add "IGNBaseTodo" layer, but not "Fondo" layer (which does not include <CRS> tags inside the <Layer> tag).

**#5 - 12/11/2012 10:13 AM - Ignacio Brodín**

- Status changed from New to Awaiting response

Could you tell me which layer cannot be loaded? I cannot reproduce the bug. I've loaded several layers without problems "Cartografía básica de la comunidad valenciana" or "cv300\_todo"

**#6 - 12/12/2012 10:27 AM - Víctor Centella Fuster**

I've been testing again "http://inspire.cop.gva.es/mapserver/wms" WMS Service, and I realized that I can load layers if the view is in SRS 23030 or SRS 4326. If the view is in SRS 25830 a secondary window shows up with the text "The layer cannot be added".

**#7 - 01/30/2013 11:49 AM - Ignacio Brodín**

- Status changed from Awaiting response to Fixed

Ok in build 2063

**#8 - 02/06/2013 10:53 AM - Joaquín del Cerro Murciano**

- Target version changed from 2.0.0-final to 2.0.0-rc5

**#9 - 02/26/2014 12:33 PM - Álvaro Anguix**

- Status changed from Fixed to Closed
