Has patch: No	Add-on resolve build:
Add-on name: Unknown	

Description

There are several places where `System.getProperties("os.name")` is called to try to detect the os of the host.

Instead of done it in different ways in different places it would be nice has a class that handles this issue.

History

#1 - 01/09/2013 06:19 PM - Francisco Puga

- Status changed from New to Fixed
- % Done changed from 0 to 100

Applied in changeset r39576.

#2 - 02/21/2014 09:40 AM - Álvaro Anguix

- Project changed from Application: gvSIG desktop to | gvSIG desktop 1
- Category deleted (Developer tools)
- Target version deleted (1.13.0)
