Description

After ungrouping, view is not refreshed after changes in layers (visibility, etc)

History

#1 - 01/09/2013 01:31 PM - Juan Lucas Domínguez

- Status changed from New to Fixed

Fixed how layers are ungrouped (removing layer also removes listeners, so it must not be the last action).

gvSIG-desktop:r39575

Test:

- create view and add two layers or more
- group layers
- ungroup layers
- check that if you make a layer visible/not visible in the TOC, then the view is refreshed as usual

#2 - 02/26/2014 12:34 PM - Álvaro Anguix

- Status changed from Fixed to Closed
