Target version:	
gvSIG version: 1.11.0	Add-on version:
Keywords: junit	Add-on resolve version:
Has patch: No	Add-on resolve build:
Add-on name: Unknown	

Description

There are a lot of unit test in the gvSIG source base. Many of them are not written for junit, many of them doesn't compile or have bad names, ...

But, is code written that can be useful to improve the reliability of the software. We should restore this tests, maybe before writing new ones.

Also we should port them to junit4.

Feel free, to let a comment if you are interested in the task, submit patches, declare yourselves to take care of a project, ...

History

#1 - 02/21/2014 09:40 AM - Álvaro Anguix

- Project changed from Application: gvSIG desktop to | gvSIG desktop 1
- Category deleted (Testing)
- Target version deleted (1.13.0)
