Add-on name:			

Description

It seems that there are some outdated projects on the repo, that are no longer used, and since a long time they are not useful.

I suggest to use the comments of this ticket to report it, and to discuss the pros and cons of remove it from the repo. By far, i don't find any con on it, but maybe someone can find a reason.

Projects that probably can be removed:

1. extGridViewLayout. http://osgeo-org.1560.n6.nabble.com/Problema-en-extGridViewLayout-td5028911.html

Feel free to add more items to the list.

History

#1 - 03/13/2013 03:55 PM - Francisco Puga

There are some more projects that probably can be removed or at least its code can be merged on other ones:

- openjdk-printing1.7
- JDialogSkin
- libGeoUtils

#2 - 01/15/2014 12:32 PM - Álvaro Anguix

- *Project changed from Application: gvSIG desktop to | gvSIG desktop 1*
- *Category deleted (Developer tools)*
- *Target version deleted (1.13.0)*
