Description

If current view does not contain completely the layer extent, then only the geometries which intersect the perimeter of the view's extent are shown, not the ones contained by the view's extent:

<http://www.ideo.es/IGN-WFS-SIGLIM/ogcwebservice>

(false WFS 1.1.0, municipios)

History

#1 - 02/18/2013 01:22 PM - Juan Lucas Domínguez

- Priority changed from Normal to Low

- gvSIG build set to 2064

It seems to be a server bug. It only returns the geometries that intersect the perimeter of the query envelope.

#2 - 02/19/2013 10:46 AM - Juan Lucas Domínguez

- Status changed from New to Fixed
