Description

I've installed gvSIG using the on-line installer gvSIG-desktop-2.0.0-2063-RC4-lin-x86-online.bin.

In *Select JRE* panel I've selected a valid 32 bits JRE.

After installation process is finished the gvSIG.sh has no reference to selected JRE and It doesn't found a valid 32 bits JRE.

He comprobado y en la 2221 no me sucede este problema. Seleccione una JRE válida y a partir de ahí funciona normal gvSIG.
Lo paso a fixed.
