gvSIG build:	1417	**Add-on build:**	
Operative System:	Windows	**Add-on resolve version:**	
Keywords:	symbol, sym	**Add-on resolve build:**	
Has patch:	No		

Description

After installing gvSIG 1.12 build 1417 on a clean machine (or simply renaming or deleting an existing gvSIG configuration folder), the gvSIG\Symbol folder and thus the Symbol library in the Symbol selection window are empty. The bug was reported by Giovanni Righini in the gvSIG Italian mailing list: https://gvsig.org/lists/pipermail/gvsig_italian/2013-March/003345.html

Best regards,

Antonio
