| Add-on name: | Thematic maps: Creator (org.gvsig.educa,thematicmap.app.editor) | | |
| Description | | | |
| <p>The test I did was:</p> <ol style="list-style-type: none">1. download the thematic map from http://downloads.gvsig.org/download/geodata/educa/ThematicMap-Uruguay_Comunicaciones-1-BN1.gvspkg2. open gvsig 2.03. open the add on manager, select the radio-button for local repository and load the new package4. Next, and check that the new thematic map is not on the list for installing. <p>This happens to me more than once, but ALWAYS when it is the first time you try it after opening gvsig. If you do those steps, then close the add-on manager and try all again, the thematic map should appear on the list. It seems to be some kind of bad refreshing for the available package list.</p> <p>I tested installing other plug-in packages and I had no problems.</p> <p>Only once the error shell has appeared, but I was not able to reproduce it.</p> | | | |

You can attach the file gvSIG-environ.info you found in HOME/gvSIG ?

#2 - 05/31/2013 12:29 PM - Victoria Agazzi

- File gvSIG-environ.info added

I had a lot of gvSIG installed, I don't know if this is important in order to have the right info on the file attached.

Best,

Viqui-
