**Description**

I've found three great problems in this plugin

- When the checkbox "tile cache" is active the layer does not load.
- The list of overviews is not listed in the information dialog.
- The tables which are pyramids of other table are listed in the list of tables to select. I think that those tables should not be shown

**History**

**#1 - 05/30/2013 05:19 PM - Ignacio Brodín**

gvSIG-raster:r1852

**#2 - 05/31/2013 09:41 AM - Ignacio Brodín**

A new problem has been detected:

The rmf file cannot be saved in disk. We need a alternative way to do that, maybe in the same database or asking the user.

**#3 - 06/04/2013 05:15 PM - Ignacio Brodín**

Now, the RMF file for PostGIS Raster layers is in a default folder. This will be the same for all remote services.

gvSIG-raster:r1859

**#4 - 08/09/2013 12:45 PM - Ignacio Brodín**

- Status changed from New to Fixed

**#5 - 02/26/2014 12:41 PM - Álvaro Anguix**

- Status changed from Fixed to Closed
