Description

When I created a new CRS (user defined), and add a layer for measuring a distance or an area, I had some troubles in order to define the polyline for measuring. It happened in both Distance and Area tool.

And also, none of the measures appeared on the bottom bar of the view.

I made the same test with a predefined CRS (an EPSG for instance) and the refresh goes ok and the values appeared on the bottom bar. It seems to be ONLY with user defined CRS.

You can test it adding the following wkt string for creating a new CRS:

```
PROJCS["ROU_USAMS",GEOGCS["GCS_Yacare",DATUM["D_Yacare",SPHEROID["International_1924",6378388.0,297.0]],PRIME["Greenwich",0.0],UNIT["Degree",0.0174532925199433]],PROJECTION["Transverse_Mercator"],PARAMETER["False_Easting",500000.0],PARAMETER["False_Northing",1000228.299],PARAMETER["Central_Meridian",-55.80],PARAMETER["Scale_Factor",1.0],PARAMETER["Latitude_Of_Origin",-0],UNIT["Meter",1.0]]
```

Thanks!
