Description

1. Open gvSIG.
2. Create a new view.
3. Load a WMS layer.
4. Set the layer as invisible.
5. Save the project.
6. Create a new project.
7. Disable the network (no connection to the Internet).
8. Open the project we saved before with the WMS layer.
9. We get an error.

Notice that the error appears even when the project was saved with the layer set as invisible.

Attached the log file and the project file.
