Description

1. Import a symbol library containing relatively big jpg files (e.g. 30 files of around 300KB)
2. Open the symbol browser.
3. Select the new folder.
4. gvSIG GUI freezes.

In general a delay is noticed when loading symbols libraries in the symbol browser, even with small ones.

History

#1 - 06/19/2013 11:55 AM - Manuel Madrid

- File gvSIG_loading_big_jpg_symbols.log added

After a long time I finally got a "Java heap space" error message. Attached the log file.

#2 - 01/13/2014 12:59 PM - Álvaro Anguix

- Status changed from New to Closed

He realizado varias pruebas en la 2166 y funciona bien. De todos modos usar imágenes demasiado grandes para usarlas como símbolo considero que realmente es un mal uso del procedimiento y no tanto un bug de gvSIG.

Lo cierro.
