<b>Add-on name:</b> Unknown	

**Description**

1. Switch off any network connections
2. Run gvSIG
3. Start freezes when last message in console is: Inicializing org.gvsig.installer.app.extension.execution.InstallPackageExtension

Attached log and info files.

### History

#### #1 - 07/15/2013 01:58 PM - Manuel Madrid

More info...

gvSIG running on Linux Ubuntu 10.04 virtual machine (Virtual Box) on Mac OS X 10.6.

If I just disable the network from the Ubuntu status bar the problem doesn't appear (gvSIG starts normally) but if I unplug the network wire the problem does appear.

Network is set as NAT.

#### #2 - 07/31/2013 09:16 AM - Manuel Madrid

- Target version changed from 2.1.0-2217-devel to 2.1.0-2223-rc1

#### #3 - 08/20/2013 11:36 AM - Juan Lucas Domínguez

I have started the current workspace (20/8/2013) after unplugging the network cable and this problem does not happen (Windows 7). gvSIG starts normally.

#### #4 - 01/13/2014 09:30 AM - Álvaro Anguix

- Status changed from New to Invalid

En la versión actual no hemos podido reproducirlo, ni en Windows ni en Linux. Le cambio el estatus a invalido.

#5 - 01/13/2014 09:31 AM - Joaquín del Cerro Murciano

- Target version changed from 2.1.0-2223-rc1 to 2.1.0-2217-devel
