Description

1. Load a vector layer in a view
2. Start editing
3. Open the attribute table
4. Select the "rename column" tool
5. It is shown a message saying "Warning: after this change, editing mode will be closed and changes will be consolidated". But this does not happen. Editing mode is not stopped and changes are not consolidated as if the user stops the editing mode and discards changes, the new column name is lost.
