Target version:	
Severity:	Add-on version:
gvSIG version: 2.0.0	Add-on build:
gvSIG build: 2066	Add-on resolve version:
Operative System:	Add-on resolve build:
Keywords:	Proyecto:
Has patch: No	Hito:
Add-on name: Unknown	

Description

1. Load a layer in a view
2. Create a mapsheet grid
3. Configure a layout from the created grid
4. Pay attention to the view frame thickness
5. Print the map sheets
6. Select PDF as output
7. Open one of the PDF files and check the view frame thickness. It is much thinner than the one in the map layout.

- Status changed from New to Awaiting response

Hello. Do you mean a different width or height of the frame or a different thickness of the border? Can you attach a screenshot where we can see the map in gvSIG and the resulting PDF?
