| Add-on name: | Unknown | Hito: | |
| Add-on version: | | | |
| Description | | | |
| It would be very useful to be able to generate a map sheets layout from a map layout template previously stored. | | | |

Just add that I think for the user is much more natural to create a grid from a layout than from scratch. The user usually knows the paper size (e.g A4, A3, etc.), not the width and height of the map area in the paper.
