Target version: 2.1.0-2217-devel	
Severity:	Add-on version:
gvSIG version: 2.1.0	Add-on build:
gvSIG build: 2205	Add-on resolve version:
Operative System:	Add-on resolve build:
Keywords:	Proyecto:
Has patch: No	Hito:
Add-on name: Unknown	

Description

1. Install gvSIG 2.1 2205
2. Run gvSIG
3. Open the addons manager and install the package org.gvsig.raster.principalcomponents.app.principalcomponents.client (the one with no name).
4. Close gvSIG.
5. Launch gvSIG. Check that the process stops at "Initializing org.gvsig.installer.app.extension.execution.InstallPackageExtension..." for several minutes and then resumes.

I deleted the folder of this extension but the problem persists. I also uninstalled gvSIG and install again with the same result.
