Description			
<p>I found an exception when I've tried to save a new project (log file attached) . On this project I've preform operations like that:</p> <ul style="list-style-type: none">- Load <i>dxf</i> layers on views- Export <i>dxf</i> layers to <i>shape</i>- Create new <i>shape</i> layers<ul style="list-style-type: none">- 2 string fields- geom <i>surface</i>- Editing the new <i>shape</i>:<ul style="list-style-type: none">- start editing- insert 4 squares- finish editing <p>After that, on save-project action, gvSIG throws an DynObject-validation exception related to a SHPNewStoreParameters. There was no way to save project.</p> <p>I've tried to reproduce it creating a new project and redo the creating steps described previously, but gvSIG worked as expected.</p>

I think this is the same as #1936 (already fixed). Try BN > 2066 and it should work.
