Has patch: No	Hito:
Add-on name: Unknown	

Description

All images loaded with the Gdal provider appear with a offset of half pixel. This error is because gdal gives as upper left corner the center of the first pixel and not its upper left corner.

History

#1 - 11/13/2013 03:36 PM - Ignacio Brodín

- Status changed from New to Invalid

Gdal returns a offset of half pixel because the georeferencing file (tfw, wld,...) gives the upper left corner in the center of the pixel

#2 - 01/13/2014 09:41 AM - Joaquín del Cerro Murciano

- Target version changed from 2.1.0-2223-rc1 to 2.1.0-2217-devel
