<b>Operative System:</b>	<b>Add-on resolve version:</b>
<b>Keywords:</b>	<b>Add-on resolve build:</b>
<b>Has patch:</b> No	

### Description

There are some projects that are not compiling because they still are looking for the old version of log4j.

```
$ find . -iname '.classpath' -exec grep -H '<classpathentry kind="lib" path="/_fwAndami/lib/log4j-1.2.8.jar"/>' {} \;
```

```
./libraries/JDialogSkin/  
./libraries/libGeocoding/  
./extensions/extNormalization/  
./extensions/extTopology/  
./prototypes/raster/extensions/extgvSIGPiloto-Raster/
```

### History

#### #1 - 01/31/2012 06:24 PM - Francisco Puga

- Status changed from New to Fixed

Fixed in r37833

JDialogSkin and extgvSIGPiloto-Raster are not compiling due to another reasons, but as it seems that they are not being used this is not a problem.

#### #2 - 02/20/2014 10:21 AM - Álvaro Anguix

- Project changed from Application: gvSIG desktop to | gvSIG desktop 1

- Target version deleted (1.12.0-rc1)
