Description

En [org.gvsig.tools.swing.impl.usability.spinner.date.NullSpinnerHandler.setValue](#) se esta metiendo en el log el valor que se le asigna a cada vez. A este metodo se le invoca cientos de veces y provoca que el log se llene de trazas que no aportan ningun valor al desarrollador. Habria que quitar esas entradas del log.

Ya puestos, repasar el metodo entero, ya que parece que hay codigo redundante.
