#### Description

Reportado por Georg Sedlmeir en lista internacional:

we are trying to connect to the official bavarian geoportal to retrieve aerial imagery using the following URL:

[http://10.176.29.48/ogc/ogc\\_dop200\\_0a.cgi?service=WMS&#38;request=GetCapabilities&#38;version=1.1.1x%x%](http://10.176.29.48/ogc/ogc_dop200_0a.cgi?service=WMS&#38;request=GetCapabilities&#38;version=1.1.1x%x%)

I'm ruling out proxy setting issues, since the connection can be established from the same computer using ArcGIS, plus I can connect to other WMS services from gvSIG. I tried with gvSIG 1.11 and 2.1. Any ideas what might be wrong?

Lo he comprobado y no se conecta.
