Operative System:		Add-on resolve build:	
Keywords:		Proyecto:	
Has patch:	No	Hito:	
Add-on name:	Unknown		
Description			
<p>OSM layers (EPSG:3857) are not reprojected on the fly in a view defined in EPSG:4326 for a quite obvious reason: the reprojection of tiles would be very expensive computationally. But consequently the coordinates showed in the status bar are not compatible with the CRS of the view. A right behavior should be switching the CRS of the view to Web Mercator when the user add an OSM layer, as it was implemented in the recent past.</p>
