Description

En desarrollo, al realizar el mvn install del proyecto org.gvsig.geoprocess no se instalan, en el lib del mainplugin, los jar's de:

- org.gvsig.toolbox.algorithm
- gishur_core
- gishur_x

Sin embargo, una vez generados los paquetes, si se instalan desde el administrador de complementos, sí se copian.

History

#1 - 09/05/2014 04:46 AM - Antonio Falciano

It happens because these three jars (note that the the first contains all the SEXTANTE geoalgorithms) are compiled, packaged and installed by another project (**gvsig-toolbox**). However, there's not trace of gvsig-toolbox project in https://redmine.gvsig.net/redmine/projects/gvsig-geoprocess project page, so it could seem that is not a public project... Fortunately, its SVN exists and is accessible publicly: http://devel.gvsig.org/svn/gvsig-toolbox/
So the gvsig-geoprocess project page needs to be updated.

#2 - 09/05/2014 10:32 AM - Antonio Falciano

I've executed the *mvn install* respectively of *org.gvsig.geoprocess* and *org.gvsig.toolbox* and effectively you're right: the three above mentioned jars are not installed in the *product* folder. However, *org.gvsig.toolbox.algorithm-1.0.4-SNAPSHOT.jar* is packaged correctly under its module *target* folder, but no relative gvspki or gvspkg.zip file is created.

#3 - 10/28/2014 10:43 AM - Joaquín del Cerro Murciano

- Target version changed from 2.2.0-2311-rc2 to 2.1.0-2259-rc3
- Assignee set to Francisco Díaz Carsí
- Status changed from New to Fixed

#4 - 11/14/2014 05:45 AM - Joaquín del Cerro Murciano

- Target version changed from 2.1.0-2259-rc3 to 2.1.0-2255-testing

#5 - 11/24/2014 08:30 AM - Álvaro Anguix

- Status changed from Fixed to Closed
