Description

"Filter" tab of WFS (available in gvSIG 1.12) is missing both in the "Add layer" dialog and the "Layer properties".

History

#1 - 08/08/2014 11:28 AM - Antonio Falciano

This causes a decrease of WFS support performance. See also #2679.

#2 - 10/22/2014 11:26 AM - Antonio Falciano

The Filter tab in the WFS wizard is still missing in gvSIG 2.1 RC2, so it's very difficult to load only a subset of features of a WFS layer without the help of an SQL expression (filter).

It's not possible to apply filter queries on a WFS layer since gvSIG 1.12. See also #3456.
