#### Description

Steps in order to reproduce this bug:

- create a view and set its CRS as EPSG:3857;
- add an OSM layer (e.g. Mapnik) to the view;
- add vector layer to be reprojected on the fly using an EPSG transformation (even if the layer will not match with the OSM one, see #2739);
  - finally, save the project.

Result: an error occurs trying to save the project due to many persistence exceptions (see the gvSIG.log in attachment).

### History

# #1 - 07/30/2014 06:30 AM - Antonio Falciano

In the third step, the EPSG transformation is not needed. For instance, the issue happens also with vector layer defined in WGS84.
