Description

It's not possible to create a new shape layer. Firstly this warning appears:

Can't create a new layer

The new layer has been successfully created but can't load the new layer. Try to load yourself, please.

Then, if I try to load the new layer manually, another warning reports:

Unknown data type 's' of attribute 'Campo1 Ns' from 'Shapes'.

It seems due to an org.gvsig.fmap.dal.feature.exception.UnknownDataTypeException (see the gvSIG.log).

History

#1 - 10/08/2014 03:51 AM - Antonio Falciano

The only way to create a new shape layer consists into skipping the creation of new fields (see #2695).

Then, if I start editing and try to add a field (e.g. Campo1 of String type) the same error appears:

Unknown data type 's' of attribute 'Campo1 Ns' from 'Shapes'.
