**Description**

After having installed gvSIG 2.1 2265, and all the available not redundant plugins, every time I launch gvSIG this error message (see attached image) appears on the bottom left corner. As soon as I start working it immediately disappears. O.S. Windows 8.1 with Java 8.

#### History

##### #1 - 01/23/2015 12:43 PM - Álvaro Anguix

Giuliano, we need the log file. Can you add?

##### #2 - 01/23/2015 01:30 PM - Giuliano Ramat

- File gvSIG.log added

Here it is. Thanks

##### #3 - 01/24/2015 10:19 AM - Antonio Falciano

Ciao Giuliano,

it seems like you have installed two different versions of the Dyschromatopsia extension:

```
INFO main org.gvsig.andami.Launcher - plugin org.gvsig.dyschromatopsia.app.extension 1.0.0-SNAPSHOT-1
```

```
INFO main org.gvsig.andami.Launcher - plugin org.gvsig.dyschromatopsia.app.mainplugin 1.0.0-2
```

So, try to remove the *extensiones/org.gvsig.dyschromatopsia.app.mainplugin* folder manually and reinstall only the latest version (1.0.0-2). Effectively there are two versions of this extension available in the Addons manager, while it should be only one.

##### #4 - 01/25/2015 10:18 AM - Joaquín del Cerro Murciano

- Target version set to 2.1.0-2266

- Assignee set to Joaquín del Cerro Murciano

##### #5 - 01/25/2015 05:38 PM - Joaquín del Cerro Murciano

- *Operative System deleted (Windows)*
- *Status changed from New to Fixed*
- *Subject changed from Errors initialisation to Errors initialisation (org.gvsig.dyschromatopsia.app.mainplugin)*

Pues parece ser que cuando adapte el proyecto a compilar con Jenkins renombre el plugin y ahora hay dos versiones de este, una obsoleta.

He incluido en el "gvspkg.options" la siguiente linea:

```
mks---exclude org.gvsig.dyschromatopsia.app.extension
```

Para que no se incluya la version antigua en la distribucion.

#### **#6 - 01/26/2015 09:42 AM - Álvaro Anguix**

- *Status changed from Fixed to Closed*
