Category:	
Target version:	
Severity:	Add-on name: Unknown
gvSIG version: 1.11.0	Add-on version:
gvSIG build:	Add-on build:
Operative System:	Add-on resolve version:
Keywords: kml	Add-on resolve build:
Has patch: No	

Description

From Gob.Vasco:

This is a bug and a feature request.

Bug: Reading new KML version is not possible in 1.11, and the layers don't support legends.

FT: Allow to write legend when exporting to KML

FT: Allow to export a point layer with text legend as a KML showing texts in Google Earth.

I put them together because the solutions are very related, and this way all changes will be accesible from here.

History

#1 - 02/15/2012 06:14 PM - Francisco José Peñarrubia

- Status changed from New to Fixed

#2 - 02/16/2012 07:01 PM - Francisco Puga

I update the classpath of extGPE-gvSIG r37967

There are some troubles with the jar of the libraries, related to #219 but i prefer wait to apply a general solution

#3 - 02/20/2014 10:21 AM - Álvaro Anguix

- Project changed from Application: gvSIG desktop to | gvSIG desktop 1

- Category deleted (Application)

- Target version deleted (1.12.0-rc1)
