Description

Running the Intersection geoprocess in gvSIG 2.1 between to polygon layers (118 and 1351 elements) takes a lot of time (it was at 5% in 15 minutes and I stopped it).

In gvSIG 1.12 it only takes about 2 minutes and it's done completely.

History

#1 - 04/21/2015 06:02 PM - Mario Carrera

- File layers-intersect.zip added

I attach the two layers of the example.

#2 - 03/04/2020 01:32 PM - Álvaro Anguix

Con mi ordenador actual va más rápido, pero aún y así le cuesta. Habría que revisar para acelerarlo.

#3 - 04/10/2020 01:39 PM - Álvaro Anguix

- Status changed from New to Closed

he probado con el 3014 de la 2.5.1 y lo hace en un par de minutos. Cierro.
