Description

The order of the fields at the 'Info by point' tool is alphabetical, but it should be the same than in the table of attributes.

I'm completely agree with Mario. Furthermore the special field "ogr_geometry" should not be mixed with the alphanumerical ones. It should be the first and also represented with a different style.

The order of fields is very important especially when we are working with tables containing several fields. The priority to fix this should be very high, although I see that the target version is undefined at the moment.
