Description

This tool does exist in the view toolbar and it would be also useful in the table toolbar.

This is based on a request of Mario Fevre (https://projects.gvsig.org/redmine/issues/334). I closed that issue as it is a feature request rather than a bug.

+1 This feature is still missing in BN2233 and seems to be very easy to implement being quite similar to the "Invert selection" tool. Such tool should be included in the (Table) "Selection" menu too.
