Application: gvSIG desktop - gvSIG bugs #3819
La carpeta de instalacion ha cambiado

10/22/2015 12:10 PM - Joaquín del Cerro Murciano

Status:	Won't fix	**% Done:**	0%
Priority:	Normal	**Spent time:**	0.00 hour
Assignee:	Joaquín del Cerro Murciano		
Category:	Installer		
Target version:			
Severity:	Minor	**Add-on version:**	
gvSIG version:	2.3.0	**Add-on build:**	
gvSIG build:	2403	**Add-on resolve version:**	
Operative System:		**Add-on resolve build:**	
Keywords:		**Proyecto:**	
Has patch:		**Hito:**	
Add-on name:	Unknown		

Description

En versiones anteriores la carpeta de instalacion era "gvSIG-desktop", en el build 2403 es "gvSIG desktop".
Habria que mantener la misma carpeta de instalacion.

#3 - 02/23/2016 10:30 AM - Antonio Falciano

- Target version changed from 2.3.0-2404 (rev. org.gvsig.desktop-2.0.107) to 2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153)

- Status changed from Closed to New

There's a bit of confusion about the install path on different operating systems.
This is the situation on Windows at the time of 2.3.0 RC1:

    C:\Program Files (x86)\gvSIG desktop 1.12.0
    C:\Program Files (x86)\gvSIG desktop 2.1.0
    C:\Program Files (x86)\gvSIG desktop 2.2.0
    C:\Program Files (x86)\gvSIG-desktop\gvSIG-desktop-2.3.0

    C:\Program Files\gvSIG-desktop\gvSIG-desktop-2.3.0

So a gvSIG-desktop folder and two minus signs are too much in Windows.

Related to #4035.

- Target version deleted (2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153))

#6 - 02/25/2016 09:37 AM - Álvaro Anguix

Hi Antonio,

Now it works equal in Linux and Windows and, for me, it's more coherent.
It's usual that an user has installed several "gvSIG versions" and I think that it's more logic to have all versions grouped in a "gvSIG-Desktop" folder.
If this doesn't cause functionals problems...I like it.

#7 - 02/25/2016 10:16 AM - Antonio Falciano

Hi Alvaro,
the actual path breaks the continuity with the previous versions, as shown in #3819#note-3, and furthermore it's not coherent with the *de facto* standard
adopted in Windows (gvsig-desktop is not the name of a software house or an organization). Furthermore we'll have path longer than
power(supercalifragilisticexpialidocious,3), bigger log files and less readable. But it doesn't affect the main gvSIG functionality for sure and if you like
it...

#8 - 02/25/2016 10:55 AM - Álvaro Anguix

According to this perhaps a good solution it will be "gvSIG/gvSIG-desktop-X.X.X"

#9 - 02/25/2016 11:50 AM - Antonio Falciano

IMHO the solution in
trunk/org.gvsig.desktop/org.gvsig.desktop.installer/org.gvsig.desktop.installer.izpack/src/main/izpack/include/variables_elements.xml should be:

```
    <variable name="TargetPanel.dir.windows" value="${APPLICATIONS_DEFAULT_ROOT}gvSIG desktop @{gvsig.version}"/>
    <variable name="TargetPanel.dir.unix"
value="${USER_HOME}${FILE_SEPARATOR}gvSIG-desktop${FILE_SEPARATOR}gvSIG-desktop-@{gvsig.version}"/>
```

 i.e. to maintain the path of previous versions in each operating system.
