Description

Arrancamos gvSIG, creamos una vista y le damos a cargar capa.
El dialogo no sale, se produce un error.

En el log el mensaje que muestra es:

```
INFO AWT-EventQueue-0 org.gvsig.andami.impl.DefaultPluginsManager$Task - Terminated startup task

Sin embargo en la consola muestra algo mas, indicando que no puede cargar la dll "osrjni.dll" por que le falta alguna dependencia.

Al parecer faltan las dll:

- gdal111.dll
- MSVCP100.dll

Bueno, pues al final no faltaba ninguna libreria, habia un error en gvSIG.sh, en la funcion "add_library_path". Faltaba añadir a PATH la ruta que recibia la funcion. Pego aqui el codigo corregido:

```
#####  
# gvSIG native libraries location  
#####  
  
export GVSIG_NATIVE_LIBS=""  
export LD_LIBRARY_PATH=""  
export PATH  
  
add_library_path() {  
  LD_LIBRARY_PATH="$LD_LIBRARY_PATH${CPSEP}$1"  
  GVSIG_NATIVE_LIBS="$GVSIG_NATIVE_LIBS${CPSEP}$1"  
  PATH="$PATH${CPSEP}$1"  
}  
  
list_shared_library_dependencies() {  
  logger_info "Cheking shared library dependencies for $1"  
  if [ "$OS" = "win" ] ; then  
    logger_cmd ./cygcheck.exe "$1"  
  else  
    logger_cmd ldd "$1"  
  fi || logger_warn "Problens checking shared library $1" || true  
}
```
