### Description

Steps in order to reproduce the bug:

- open gvSIG 2.2 final, create and open a view;
- add a raster layer whose file path contains a space;
- save and close the project;
- open gvSIG 2.3 build 2414;
- finally open the gvSIG 2.2 project saved before.

Result: the project is opened, but the raster layer is greyed out in the ToC and is not loaded.

See the gvSIG.log in attachment.

Note: the project can't be opened in gvSIG 2.2 without problems.
