Add-on name:	Unknown		
Description			
I can't open the "New CRS" wizard because of corrupted plugin persistence (in attachment).			

History

#1 - 01/20/2016 06:12 PM - Antonio Falciano

If I delete the plugin-persistence.dat file from gvSIG\plugins\org.gvsig.projection.app.jcrs folder, the "New CRS" wizard works again.

#2 - 01/30/2016 08:02 PM - Antonio Falciano

- Status changed from New to Closed

This issue happened after that a prj was not identified (e.g. EPSG:3857) only in builds 2415 and 2416. It doesn't happen anymore in build 2417, so I close the ticket.

#3 - 02/01/2016 04:53 PM - Joaquín del Cerro Murciano

- Target version changed from 2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153) to 2.3.0-2418 (rev. org.gvsig.desktop-2.0.124)
