Description

The "Add measure" tools don't support multipart layers actually and it's not obvious for users to have to split the multipart features in order to add measure fields.

About this issue: <http://osgeo-org.1560.x6.nabble.com/Problem-creating-td5247461.html>

History

#1 - 01/27/2016 05:53 PM - Antonio Falciano

- Target version changed from 2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153) to 2.3.0-2417 (rev. org.gvsig.desktop-2.0.123)

- Status changed from New to Invalid

If the features are multipart, also the measures can be one or more. There's a one-to-many relationship between the table records and the single parts, so it's not possible to calculate a unique measure for each record.
